

A.2. Elevation and plan of line AB measures 70 mm and 60 mm. Point A is 10 mm above H.P. and 15 mm in front of V.P. Draw its projections, when the distance between end projectors is 45 mm. Determine its true length and inclination of line with H.P. and V.P. Assume line in 1st quadrant.

Solution : Refer fig. 5.92.

Fig. 5.92

A.4. A line AB is 70 mm long. Its F.V. is 45° inclined to x-y line and measures 50 mm. The end point A is 20 mm above H.P. and 10 mm in front of V.P. Draw the projections of line and find its inclination with H.P. and V.P. Assume line in 1st quadrant.

Solution : Refer fig. 5.94.

Fig. 5.94

A.5. A line AB is inclined at 30° to the H.P. Its end A is 10 mm above H.P. and 15 mm in front of V.P. The F.V. and T.V. of line measures 50 mm and 60 mm respectively. Draw its projections and determine its true length and inclination with V.P. Assume line in 1st quadrant.

Solution : Refer fig. 5.95.

Fig. 5.95

A.6. A line AB, 80 mm long, is inclined at 30° to the H.P. Its end A is 15 mm above H.P. and 20 mm in front of V.P. The F.V. of line measures 60 mm. Draw the top view of line and determine the inclination of line with V.P. Assume line in 1st quadrant.

Solution : Refer fig. 5.96.

Fig. 5.96

... 600 ... H.P. Its end A is 15 mm above

A.7. A line AB is 70 mm long. Its F.V. measures 50 mm. The end A is on H.P. and 15 mm in front of V.P. End B is 40 mm above H.P. Draw its projections and find inclination of line with H.P. and V.P. Assume line in 1st quadrant.

Solution : Refer fig. 5.97.

Fig.

A.8. A line AB is inclined at 30° to the H.P. Its end A is 15 mm above H.P. and 20 mm in front of V.P. The distance between end projectors is 50 mm and the T.V. of line measures 70 mm. Draw its projections and determine its true length and inclination of line with V.P. Assume line in 1st quadrant.

Solution : Refer fig. 5.98.

Fig. 5.98
