

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE

Supplementary Examination, January - 2023

Course: B. Tech

Semester: I

Subject Name: Basic Computer Programming

Subject Code: ICT206

Max Marks: 60

Date: 17/01/2023

Duration: 3 Hr.

Instructions to the Students:

1. *All Questions are compulsory.*
2. *Each question carries 12 marks.*
3. *Figures to the right indicate full marks.*
4. *Assume suitable data wherever necessary and mention it clearly.*

Q. 1 Solve any two of the following

- A) Explain different phases in programming process. (6)
- B) Draw the flowchart and write algorithm and program to find the area of the circle. (6)
- C) ii) Differentiate between (6)
 - a) Compiler
 - b) Interpreter

Q.2 Solve the following

- A What is variable? What are the rules for defining variables? Differentiate between local variable and global variable? (6)
- B) Explain any three types of operators with example. (6)

OR

- B) Write short note on assignment operator. (6)
- C) Write a program to find the factorial of the number. (6)

Q.3 Solve any two of the following

- A) What is the purpose of main() function? What is an argument? Differentiate between formal arguments and actual arguments? (6)
- B) Write a C program to show table of a number using functions. (6)
- C) Write the program using Switch Statement which takes an arithmetic operator +, -, *, / and two operands from the user as an input and performs the calculation on the two operands. (6)

Q.4 Solve the following

- A) Define Array. What are various types of array? Give the syntax of any two of them. (6)
- B) Write a program to read 10 elements from the user by using array and display the squares of the elements. (6)

OR

- B)** Write a program to find minimum number in an array containing five elements of integer type. (6)
- C)** Define string in C? Write syntax to declare character array. How to initialize Character array? (6)

Q.5 Solve any two of the following

- A)** Explain the following with examples. (6)
 - i) What is structure? How to create structure?
 - ii) How to initialize structure members? How to access structure elements?
- B)** Write a C program to store information(name, Rollno and Marks) of a student and displays it on the screen using structure. (6)
- C)** Explain the following any two string functions with using library functionwith a simple example: (6)
 - a) Strcpy
 - b) Strlen
 - c) Strcat
 - d)strncat
 - e)Strrev

***** End *****
