

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE

Supplementary Summer Examination – 2025

Course: B.Tech

Branch : Common To All Branches

Semester : I

Duration: 3 Hr.

Subject Code & Name: Computer Programming in C [BTES104]

Max Marks: 60

Date: 24-07-2025

Instructions to the Students:

1. Each question carries 12 marks.
2. Question No. 1 will be compulsory and include objective-type questions.
3. Candidates are required to attempt any four questions from Question No. 2 to Question No. 6.
4. The level of question/expected answer as per OBE or the Course Outcome (CO) on which the question is based is mentioned in () in front of the question.
5. Use of non-programmable scientific calculators is allowed.
6. Assume suitable data wherever necessary and mention it clearly.

(Level/ Mark
CO) s

Q. 1 Objective type questions. (Compulsory Question)

12

- 1 In a flowchart, the decision-making is represented by which symbol?

1

- a. Rectangle b. Oval c. Diamond
Parallelogram

- 2 Which of the following is a valid variable name in C?

1

- a. 123num b. num_1 c. float d. if

- 3 Which of the following is a logical operator in C?

1

- a. + b. && c. = d. %

- 4 Which of the following data types has the largest size in C (assuming standard 32-bit compiler)?

1

- a. char b. int c. float d. double

- 5 What is the result of the expression (5 + 3) * 2 in C?

1

- a. 16 b. 11 c. 13 d. 10

- 6 Which of the following is a valid syntax of an if statement in C?

1

- a. if {x > 0} b. if (x > 0) c. if x > 0 d. if x > 0:

- 7 Which of the following loops is guaranteed to execute at least once?

1

- a. for loop b. while loop c. do-while d. All of the

Q.5 Solve Any Two of the following. 12

- A) Define Array. What are various types of array? Give the syntax of any two of them. 6
- B) Write a program to read 10 elements from the user by using array and display the sum of the elements. 6
- C) Write a program to find minimum number in an array containing five elements of integer type. 6

Q. 6 Solve Any Two of the following. 12

- A) What is structure? How to create structure? How to initialize structure members? How to access structure elements? 6
- B) Write a program in C to create a structure of student with student name and rollno and marks of two subjects as its members. Calculate average of two subjects. Read the details of n students from user and then display the data in this format. 6

Roll No. Name Sub1 Sub2 Total Average

- C) Explain the following any three string functions by using library function with a simple example: 6
- a) Strcpy
 - b) Strlen
 - c) Strcat
 - d)strncat
 - e)Strev

***** End *****
