

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE**Supplementary Summer Examination – 2025****Course: B.Tech****Branch : Common To All Branches****Semester :II****Subject Code & Name: Computer Programming in C [BTES204]****Max Marks: 60****Date:08/07/25****Duration: 3 Hr.****Instructions to the Students:**

1. Each question carries 12 marks.
2. Question No. 1 will be compulsory and include objective-type questions.
3. Candidates are required to attempt any four questions from Question No. 2 to Question No. 6.
4. The level of question/expected answer as per OBE or the Course Outcome (CO) on which the question is based is mentioned in () in front of the question.
5. Use of non-programmable scientific calculators is allowed.
6. Assume suitable data wherever necessary and mention it clearly.

		(Level/ CO)	Mark s
Q. 1	Objective type questions. (Compulsory Question)		12
1	Flowcharts are primarily used to: a. Debug a program b. Represent algorithm graphically c. Compile code d. Execute logic	CO1	1
2	Which of the following is a valid variable name in C? a. 1variable b. variable@name c. _variable1 d. int	CO2	1
3	Which of the following represents the correct sequence of the programming process? a. Compiling → Editing → Executing → Testing b. . Editing → Compiling → Executing → Testing c. Editing → Executing → Compiling → Testing d. Testing → Compiling → Editing → Executing	CO1	1
4	Which of the following is not a valid C data type? a. float b. char c. real d. int	CO2	1
5	Which operator has the highest precedence in C? a. = b. ++ c. . && d. ==	CO2	1
6	Which loop checks the condition after executing the body?	CO3	1

	a. for	b. while	c. do-while	d. if		
7	What will be the value of x after executing: int x = 5; x += 2 * 3;?				CO3	1
	a.11	b. 16	c. 7	d. 10		
8	Which loop checks the condition after executing the body?				CO3	1
	a. for	b. while	c. do-while	d. if		
9	Which operator is used to access the address of a variable?				CO5	1
	a. *	b. &	c. ->	d. []		
10	A function in C must always:				CO4	1
	a. Return an integer	b. Be recursive	c. Be declared before use	d. Be void		
11	How are strings represented in C?				CO4	1
	a. Arrays of int	b. Arrays of float	c. Arrays of char ending with \0	d.Arrays of bool		
12	A structure in C is used to:				CO5	1
	a. Perform loops	b. Store multiple variables of the same type	c. Store multiple variables of different types	d. Store arrays		
Q. 2	Solve the following.					12
A)	Explain the steps involved in the C programming process including editing, compiling, debugging, executing, and testing.				CO1	6
B)	Draw a flowchart and write program calculate the factorial of a number.				CO1	6
Q.3	Solve the following.					12
A)	Write a C program to demonstrate use of all arithmetic, relational and logical operators.				CO2	6
B)	Explain operator precedence and associativity in C with a suitable example.				CO2	6
Q. 4	Solve Any Two of the following.					12

A)	Write a program to find whether a given number is prime or not using for loop	CO3	6
B)	Explain the usage of if-else-if ladder and switch statement in C with examples.	CO3	6
C)	Write syntax of following. 1.For loop 2. While loop 3. Do while loop	CO3	6
Q.5	Solve Any Two of the following.		12
A)	Define an array? Enlist types of arrays with syntax.	CO4	6
B)	Write a program to demonstrate any three inbuilt string functions.	CO4	6
C)	Explain how character arrays are initialized in C with examples.	CO4	6
Q. 6	Solve Any Two of the following.		12
A)	Write a program a structure to store student details (name, roll number, marks). Write a program to read and display data for 3 students.	CO5	6
B)	Differentiate between structure and array in C. Explain with examples where both are used.	CO5	6
C)	Define a structure in C. What are its advantages?	CO5	6
	*** End ***
