

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE

Supplementary Examination, January - 2023

Course: B. Tech

Semester: I/II

Subject Name: Computer Programming in C

Subject Code: CP1204/BTES104/BTES204

Max Marks: 60

Date: 17/01/23

Duration: 3 Hr.

Instructions to the Students:

1. All Questions are compulsory.
2. Each question carries 12 marks.
3. Figures to the right indicate full marks.
4. Assume suitable data wherever necessary and mention it clearly.

Q. 1 Solve any two of the following

- A) Explain different phases in programming process. (6)
- B) Draw the flowchart and write algorithm and program to find the largest integer among three integers. (6)
- C) ii) Write short note on (6)
 - a) Compiler
 - b) interpreter

Q.2 Solve the following

- A) Explain Token with example. (6)
- B) Explain any three types of operators with example. (6)

OR

- B) Write short note on conditional operator. (6)
- C) i) Which of the following is true for variable names in C? (2)
 - a) They can contain alphanumeric characters as well as special characters
 - b) It is not an error to declare a variable to be one of the keywords (like goto, static)
 - c) Variable names cannot start with a digit
 - d) Variable can be of any length
- ii) Which is correct with respect to the size of the datatypes? (2)
 - a) char > int > float
 - b) int > char > float
 - c) char < int < double
 - d) double > char > int
- iii) Operator ' % ' in c language is called? (2)
 - a) Percentage Operator
 - b) Quotient Operator
 - c) Modulus
 - d) Division

Q.3 Solve any two of the following

- A) What is function in C? Write the syntax for function prototype, function definition and (6)

function call.

- B) Write a C program to show table of a number using functions. (6)
- C) Write the syntax, flow chart and explain (6)
 - i) for loop
 - ii) while loop

Q.4 Solve the following

- A) Define Array. What are various types of array? Give the syntax of any two of them. (6)
- B) Write a program to read 10 elements from the user by using array and display the sum of the elements. (6)

OR

- B) Write a program to find maximum number in an array containing five elements of integer type. (6)
- C) Define string in C? Write syntax to declare character array. How to initialize Character array? (6)

Q.5 Solve any two of the following

- A) Write a program in C to create a structure having named as Books consists of title, author, subject, book_id as its members. Read the details of five books from user and then display the data entered by the user on Screen (Use array of structure). (6)
- B) Write a program in C to create a structure of student with student name and rollno and marks of two subjects as its members. Calculate average of two subjects. Read the details of n students from user and then display the data in this format. (6)

Roll No. Name Sub1 Sub2 Total Average

- C) Define structure in C? What are the different ways to declare structure variables? (6)

***** End *****
