

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE

Regular and Supplementary Summer 2024

Course: B. Tech.

Branch: [Common To All Branches]

Semester : II

Subject Code & Name: Computer Programming in C [BTES204]

Max Marks: 60

Date: 20/06/2024

Duration: 3 Hr.

Instructions to the Students:

- 1 All the questions are compulsory.
- 2 The level of question/expected answer as per OBE or the Course Outcome (CO) on which the question is based is mentioned in () in front of the question.
- 3 Use of non-programmable scientific calculators is allowed.
- 4 Assume suitable data wherever necessary and mention it clearly.

	(Level/CO)	Marks
Q. 1 Solve Any Two of the following.		12
A) What is error? What are different types of errors? Explain in detail.	CO1	6
B) Define algorithm. Write algorithm to calculate simple interest and compound interest.	CO1	6
C) Define the following terminologies: i. IDE ii. Editor iii. Program	CO1	6
Q.2 Solve Any Two of the following.		12
A) What are the differences between equality and assignment operator explain with example. Explain pre-increment and post-increment operators.	CO2	6
B) Explain data types in C.	CO2	6
C) Write C program to illustrate operator precedence of following expression: 10 + 20 - 30/2	CO2	6
Q. 3 Solve Any Two of the following.		12
A) Write a C program to check entered number is even or odd.	CO3	6
B) Write a c program to check whether a number entered by the user is an perfect number or not.	CO3	6
C) Write syntax of the following: i. Switch Case ii. While loop iii. For Loop	CO3	6
Q.4 Solve Any Two of the following.		12
A) Write program to calculate factorial of a number using function.	CO4	6
B) What is a function? Explain function declaration, function definition and function calling.	CO4	6
C) Write a c program to demonstrate following string function: i. strlen ii. strcat iii. strcpy	CO4	6
Q. 5 Solve Any Two of the following.		12
A) What is difference between array and Structure? Explain with suitable example and syntax.	CO5	6
B) Write a c program using structure to print data of a student with individual initialization of member variables.	CO5	6

- C) Write a program in C to create a structure having information about books (book id, name, author, publisher). Read the data of 6 books from the user and display the data entered by the user on the screen.
