

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE

Supplementary Winter Examination – 2024

Course: B.Tech

Branch :Mechanical Engineering

Semester :IV

Subject Code & Name: Theory of Machines-I & BTMEC402_Y19

Max Marks: 60

Date: 21/12/2024

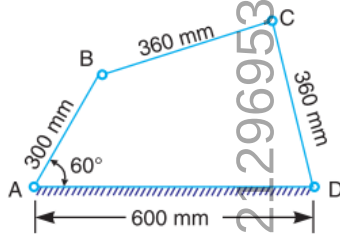

Duration: 3 Hr.

Instructions to the Students:

1. Each question carries 12 marks.
2. Question No. 1 will be compulsory and include objective-type questions.
3. Candidates are required to attempt any four questions from Question No. 2 to Question No. 6.
4. The level of question/expected answer as per OBE or the Course Outcome (CO) on which the question is based is mentioned in () in front of the question.
5. Use of non-programmable scientific calculators is allowed.
6. Assume suitable data wherever necessary and mention it clearly.

		(Level/CO)	Marks
Q. 1	Objective type questions. (Compulsory Question)		12
1	In a reciprocating steam engine, which of the following forms a kinematic link ?	CO1	1
	a. cylinder and piston b.piston rod and connecting rod c. crank shaft and flywheel d.flywheel and engine frame		
2	The motion of a piston in the cylinder of a steam engine is an example of	CO2	1
	a. completely constrained motion b.incompletely constrained motion c. successfully constrained motion d. none of these		
3	The component of the acceleration, parallel to the velocity of the particle, at the given instant is called	CO3	1
	a. The component of the acceleration, parallel to the velocity of the particle, at the given instant is called b.tangential component c. coriolis component d. none of these		
4	The direction of linear velocity of any point on a link with respect to another point on the same link is	CO3	1
	a.parallel to the link b.perpendicular to the link c. at 45° to the link d.none of these		

	joining the points	joining the points	joining the points			
5	The angle of inclination of the plane, at which the body begins to move down the plane, is called				CO3	1
	a. angle of friction	b. angle of repose	c. angle of projection	d. none of these		
6	The frictional torque transmitted by a disc or plate clutch is same as that of				CO4	1
	a. flat pivot bearing	b.flat collar bearing	c. conical pivot bearing	d.trapezoidal pivot bearing		
7	The frictional torque transmitted by a cone clutch is same as that of				CO4	1
	a. flat pivot bearing	b.flat collar bearing	c. conical pivot bearing	d.trapezoidal pivot bearing		
8	The brakes commonly used in railway trains is				CO4	1
	a. shoe brake	b. band brake	c. band and block brake	d.internal expanding brake		
9	The brake commonly used in motor cars is				CO4	1
	a. shoe brake	b.band brake	c. band and block brak	d.internal expanding brake		
10	The size of a cam depends upon				CO5	1
	a. base circle	b.pitch circle	c. prime circle	d.pitch curve		
11	The angle between the direction of the follower motion and a normal to the pitch curve is called				CO5	1
	a. pitch angle	b.prime angle	c. base angle	d.pressure angle		
12	The balancing of rotating and reciprocating parts of an engine is necessary when it runs at				CO6	1
	a. slow speed	b.medium speed	c. high speed	d.none of these		
Q. 2	Solve the following.					12

A)	Explain inversion of four chain mechanism	CO1	6
B)	In a pin jointed four bar mechanism, as shown in Fig.1.1, AB = 300 mm, BC = CD = 360 mm, and AD = 600 mm. The angle BAD = 60°. The crank AB rotates uniformly at 100 r.p.m. Locate all the instantaneous centre and find the angular velocity of the link BC  Fig 1.1	CO2	6
Q.3	Solve the following.		12
A)	Explain Laws of Static Friction and Laws of Solid Friction	CO3	6
B)	Derive torque transmission capacity Flat Pivot Bearing on uniform pressure basis.	CO3	6
Q. 4	Solve Any Two of the following.		12
A)	Explain with neat sketch multiple clutch	CO4	6
B)	Explain Simple Band Brake	CO4	6
C)	Explain with neat sketch Epicyclic-train Dynamometer	CO4	6
Q.5	Solve Any Two of the following.		12
A)	Write short note on classification of follower	CO5	6
B)	Explain terms base circle, pitch point, lift, pressure angle, trace point, pitch curve	CO5	6
C)	A cam is to be designed for a knife edge follower with the following data : Cam lift = 40 mm during 90° of cam rotation with simple harmonic motion, Dwell for the next 30°, During the next 60° of cam rotation, the follower returns to its original position with simple harmonic motion, Dwell during the remaining 180°, Draw the profile of the cam when the line of stroke of the follower passes through the axis of the cam shaft,	CO5	6

Q. 6	Solve Any Two of the following.		12
A)	Explain . Balancing of Several Masses Rotating in the Same Plane	CO6	6
B)	Four masses m_1 , m_2 , m_3 and m_4 are 200 kg, 300 kg, 240 kg and 260 kg respectively. The corresponding radii of rotation are 0.2 m, 0.15 m, 0.25 m and 0.3 m respectively and the angles between successive masses are 45° , 75° and 135° . Find the position and magnitude of the balance mass required, if its radius of rotation is 0.2 m	CO6	6
C)	Explain Balancing of a Single Rotating Mass By a Single Mass Rotating in the Same Plane	CO6	6
	*** End ***
