

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE**Regular & Supplementary Winter Examination – 2024****Course: B. Tech.****Branch: Mechanical Engineering /Mechanical Engineering (Sandwich)****Semester :VII****Subject Code & Name: Non- conventional Machining (BTMPE703C)****Max Marks: 60****Date: 10/02/2025****Duration: 3 Hr.****Instructions to the Students:**

1. Each question carries 12 marks.
2. Question No. 1 will be compulsory and include objective-type questions.
3. Candidates are required to attempt any four questions from Question No. 2 to Question No. 6.
4. The level of question/expected answer as per OBE or the Course Outcome (CO) on which the question is based is mentioned in () in front of the question.
5. Use of non-programmable scientific calculators is allowed.
6. Assume suitable data wherever necessary and mention it clearly.

		(Level/CO)	Mark
Q.	Objective type questions. (Compulsory Question)		12
1			
1	Non-Traditional machining can also be called as?	Recall/CO1	1
	a. Contact machining	c. Partial contact machining	
	b. Non-contact machining	d. Half contact machining	
2	Which of the following is a conventional process of machining?	Recall/CO1	1
	a. Cylindrical Grinding	c. Electron beam machining	
	b. Electrochemical machining	d. Water jet machining	
3	In electro-discharge machining, dielectric is used to -----	Recall/CO2	1
	a. help in the movement of the sparks	c. act as coolant	
	b. control the spark discharges	d. all of the mentioned	
4	In the laser beam machining process, as compared to other unconventional machining processes, the heat-affected zone is ----	Recall/CO2	1
	a. Larger	c. Not present	
	b. Smaller	d. Moderate	
5	Ultrasonic Machining can be used for which of the following processes and applications?	Recall/CO3	1
	a. Drilling	c. Polishing	
	b. Sinking and Contouring	d. All of the above	
6	Which of the following material cannot be machined using ECM?	Understand /CO3	1
	a. High strength alloys	c. Non conductive materials	
	b. Hardened steel	d. All of the above	
7	What are the machining rates used in Micro-EDM process?	Recall/CO6	1
	a. 0.1 to 2 mm/min	c. 10 to 200 mm/min	
	b. 1 to 20 mm/min	d. 100 to 500 mm/min	
8	Which of the following is an example of hybrid machining?	Recall/CO5	1
	a. Ultrasonic Machining	c. Ultrasonic assisted electrochemical machining	
	b. Electron Beam Machining	d. Laser Beam Machining	

9	Which type of materials cannot be machined using Abrasive jet machining?		Recall/CO4	1
	a. Soft materials b. Hard materials	c. Difficult to cut materials d. None of the above		
10	How are the machining times in Laser beam machining?		Recall/CO4	1
	a. Very slow b. Slow	c. Moderate d. Fast		
11	In ECG, grinding action removes _____		Understand /CO5	1
	a. workpiece material from the surface b. corroded surface layer making workpiece ready for electro-chemical process	c. Oxide film formed on the surface d. particles removed from surface after chemical action		
12	Which of the following is true about AJMM?		Recall/CO6	1
	a. It is a low cost method b. It is toxic towards the environment	c. It is hazardous to human health d. It is not capable of anisotropic machining		
Q. 2	Solve the following.			12
A)	Discuss the factors to be considered while selecting the non-conventional machining processes.		Understand /CO1	6
B)	Explain the classification of unconventional machining according to major energy source employed. What is the importance of unconventional machining?		Understand /CO1	6
Q.3	Solve the following.			12
A)	Explain the different types of maskants and etchants used in chemical machining process.		Understand /CO2	6
B)	Explain with a neat sketch the working principle and the parametric influence of abrasive jet machining.		Understand /CO3	6
Q. 4	Solve Any Two of the following.			12
A)	What are the main functions of electrolysis in the ECM? How the current density affects the material removal rate?		Understand /CO3	6
B)	List the various process parameters of USM and explain the effect of amplitude, frequency, static load and abrasive size in MRR and surface finish.		Recall/CO3	6
C)	Explain process parameters and process characteristics of PAM process.		Understand /CO3	6
Q.5	Solve Any Two of the following.			12
A)	List the merits and demerits of Laser Beam Machining process.		Recall/CO4	6
B)	Differentiate between the water jet cutting and the abrasive water jet cutting.		Understand /CO4	6
C)	Explain with a neat diagram the working principle of abrasive jet machining and its applications.		Understand /CO4	6
Q. 6	Solve Any Two of the following.			12
A)	Sketch and explain the electro-chemical Honing process.		Understand /CO5	6

B)	What is the process of ELID Grinding? Differentiate between conventional grinding with the ELID Grinding.	Understand /CO5	6
C)	How internal surface of components can be deburred, polished by abrasive flow finishing? Explain.	Understand /CO5	6
