

**DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY,
LONERE - RAIGAD -402 103**

End Semester Examination -May- 2018

Branch: B.Pharm

Subject: Pathophysiology (BP204T)

Date: - 28/05/18

Sem.:- II

Marks: 75

Time: 10 am to 1 pm

Q.1. Multiple choice questions

(1 X 20 = 20)

All questions are compulsory.

- 1) When the pH value of body fluids is below 7.3 the condition is called as _____.
a) Acidosis b) Alkalosis c) Metabolic alkalosis d) Cellular swelling
- 2) In action potential of cardiac muscle Repolarisation observe in _____ Phase.
a) 0 b) I c) II d) III
- 3) 'Programmed and coordinated cell death' is called as _____.
a) Cell Injury b) Autolysis c) Necrosis d) Apoptosis
- 4) Pain sign of inflammation is also called as _____.
a) Rubor b) Tumor c) Dolor d) Calor
- 5) The risk of developing high blood pressure can be reduced by _____.
a) Eating a balanced diet
b) Reducing salt intake
c) Avoiding alcohol
d) Taking regular physical activity

- 6) Pernicious anemia is a form of what class of anemia.
- Macrocytic megaloblastic
 - Macrocytic non megaloblastic
 - Microcytic hypochromic
 - Microcytic normochromic
- 7) Due to contraction of bronchi _____
- It is difficult to inhale air
 - It is difficult to exhale air
 - It is difficult to breathe
 - It is difficult to cough
- 8) Cellular adaptations in which cell increases their number is called as _____
- Metaplasia
 - Dysplasia
 - Hyperplasia
 - Hypertrophy
- 9) HIV infection results in _____
- Focal segmental glomerulosclerosis
 - IgA nephropathy
 - Membranous nephropathy
 - Minimal change disease
- 10) Impotence is expressed as _____
- Inability to perform sexual act
 - Failure to ejaculation
 - Inability to fertilize
 - Primitive ejaculation
- 11) Bradykinesia of Parkinson's disease is _____
- Hurried walking
 - Slowness of movement
 - Small handwriting
 - Soft speech

- 12) Physiologically, what happens to the brain as Alzheimer's progress?
 a) Tissue swell b) Fluid collect c) Cell death d) Brain stem atrophies
- 13) Wound contraction is due to _____
 a) Myocyte b) Fibroblast c) Myofibroblast d) Skeletal muscle fibre
- 14) Cells most sensitive to hypoxia are _____
 a) Myocardial cells b) Neurons c) Hepatocytes d) Renal tubular epithelial cell
- 15) Neonatal jaundice _____
 a) Is a rare condition in newborn
 b) Is a serious condition that needs immediate treatment.
 c) Has long term effects.
 d) Occurs 3 or 4 days after birth in about 50% of newborn.
- 16) Cancer of β lymphocytes is called as _____
 a) Sarcoma b) Melanoma c) Myeloma d) Carcinoma
- 17) Cancer is caused by _____
 a) Uncontrolled mitosis
 b) Uncontrolled meiosis
 c) Rupturing of cells
 d) Loss of immunity of cells
- 18) Enteric fever is caused by _____
 a) S. Typhi b) S. Paratyphi A c) S. Paratyphi B d) All
- 19) The role of reverse transcriptase is to _____
 a) Make RNA from DNA c) Make capsid
 b) Make DNA from RNA d) Make a provirus
- 20) HIV attacks the _____ immune cells
 a) Cytotoxic T cells b) B Lymphocytes c) Helper T cells d) Macrophage

Dr. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY LONERE

Summer Semester Examination-MAY-2019

Course: B. Pharm

Semester: II

Subject with subject code:- Pathophysiology (BP204T)

Date:- 01-06-2019

Marks:- 75 marks

Duration: 3 hrs

Instructions:- i) All questions are compulsory

ii) Figures to the right indicate full marks

iii) Draw the diagrams or flow charts wherever necessary.

Q. No. 1 Attempt the following questions (All Questions Compulsory) (20 Marks)

1) Examination of the brains of ALZHEIMER'S DISEASE patients has revealed deposition.....

- a) protein b) amyloid β protein and neurofibrillary tangles c) fat d) Dopamine

2) The repetitive seizure that leads to jerking and muscle spasms called as

- a) Seizure b) Epilepsy c) Convulsion d) none of these

3)is a form of arthritis characterized by the formation of uric acid crystals and severe inflammation.

- a) Rheumatoid arthritis b) Osteoarthritis c) spondylitis d) Gout.

4) Asthma is the _____ hypersensitivity reaction

- a) Type II b) Type IV c) Type I & II d) Type I

5) Which is the most common micro-organism responsible for UTI in adult.

- a) Streptococcus faecalis b). Escherichia coli c) Klebsiella d). Streptococcus pneumonia

6) What promotes vasodilation in acute inflammation?

- a) chemokines, cytokines, histamine c) histamine, prostaglandins, chemokines
b) cytokines d) Histamine, prostaglandins, nitric oxide

7) Which of the following DNA virus causes Viral Hepatitis.

- a) HBV b) HCV c) HAV d) both b & c

8) Which of the following causative factor for emphysema.

- a) Cigarette smoking b) Antioxidant deficiency c) Deficiency of α_1 antitrypsin d) All of these

9) H. pylori infection responsible for

- a) Ulcerative colitis b) Crohn's disease c) peptic ulcer d) liver cirrhosis

10) Hypertrophy is a/an/the

- a) An increase in both the size and number of cells c) Development of new abnormal cells
b) Increase in the size of cells d) Increase in the number of cells

undefined

11) Select the true statement from the following.

- a). The older we get, the greater is our risk to develop high blood pressure
- b) Hypertension shows symptoms in most people
- c) Sea salt contains lots of mineral so it is good for hypertension.
- d) Being overweight is not risk factor to hypertension.

12) Pick the cytokines released by lymphocytes

- a). histamine b). TNF c). IL-1 d). b & c

13). Glioma or astrocytoma is cancer of

- a). smooth muscle b) bone c) neurogenic connective tissue d) Glands

14) Tightly regulated intracellular program cell death

- a) Necrosis b) apoptosis c) Caseous Necrosis d) both a & b

15) Cystitis & Pylonephritis is the infection of respectively.

- a) urethra & urinary bladder b) urinary bladder and kidney c) kidney & urethra d) none of these

16) The movement of leukocytes from the vessel lumen into in to a damaged area is called

- a) chemokines b) phagocytosis c) chemotaxis d) both b & c

17) The process of spread of tumour from primary site to secondary site is called.....

- a) Mutation b) Initiation c) Metastasis d) Promotion.

18) *Intrinsic factor* (IF) is required for..... absorption

- a) cobalamine b) folic acid c) thiamine d) pyridoxine .

19) Hemophilia A & hemophilia B caused by deficiency of factor & respectively

- a) VIII, XI b) II, IX c) VII, IX d) VIII, IX

20) Complications of atherosclerosis except

- a) Coronary artery disease. b) Peripheral artery disease c) asthma d) Aneurysms

Q. No.2 Attempt any TWO questions of the following

(20 marks)

A] Define, sign and symptoms of inflammations. Describe the mechanism of inflammation by summarizing chemical mediators of inflammation.

B] Discuss etiology and pathogenesis of cancer. Write classification of cancer.

C] What is cell adaptation? Enlist cell adaptation with example. Write note on morphological changes associated with cell injury.

Q. No. 3 Attempt any SEVEN questions of the following

(35 Marks)

A] Enlist the causes of cell injury. Explain mechanisms of cell injury.

B] What is diabetes mellitus? Give its type and clinical manifestations of diabetes mellitus.

C] Define homeostasis. Justify regulation of homeostasis with the help of example.

- D] Write etiology, pathogenesis and complications of congestive heart failure.
- E] Evaluate Pathophysiology of Rheumatoid arthritis.
- F] Classify anemia. Write note on hemolytic anemia.
- G] Discuss mode of transmission and Pathogenesis of AIDS.
- H] Evaluate etiopathogenesis of Asthma.
- I] What do you mean by meningitis? Describe in short about the causes, clinical manifestation and pathogenesis.

END

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY
LONERE - RAIGAD - 402 103
Winter Semester Examination - Dec. - 2019

Course: B.Pharm.

Subject with Subject Code: Pathophysiology (BP204T)

Date: 10/12/2019

Semester: I

Marks: 75

Duration: 3hrs

- Instructions: i) All questions are compulsory
ii) Figures to the right indicate full marks
iii) Draw the diagrams or flow charts wherever necessary.

Q.No.1 Attempt the following questions (All Questions Compulsory)

(20 Marks)

1. All are pro-apoptotic proteins except
 - A. BAD
 - B. BAK
 - C. BAX
 - D. BCL-X
2. The most thrombogenic constituent of atheroma is
 - A. Fibrous cap
 - B. Lipid core
 - C. Foam cells
 - D. Smooth muscle cells
3. Which of the following is NOT an obstructive condition?
 - A. Fibrosis
 - B. Asthma
 - C. COPD
 - D. Bronchiectasis
4. In dystrophic calcification, calcium levels are?
 - A. Decreased
 - B. Elevated
 - C. Highly elevated
 - D. Normal
5. Which are the risk factors for development of asthma?
 - A. High exposure to airborne allergens
 - B. Exposure to tobacco smoke
 - C. High birth weight
 - D. Genetic factors
6. When thrombus gets free-floating and is dislodged then thrombus leads to
 - A. Embolus
 - B. Bolus
 - C. Acidosis
 - D. Hypnosis
7. What are bradykinin, prostaglandins and serotonin?
 - A. Chemical mediators that induce pain
 - B. Components of cell wall
 - C. Neurotransmitters
 - D. Organelles of a eukaryote

8. All are features of nephritic syndrome except,
- A. Hematuria
 - B. Proteinuria
 - C. Oligouria
 - D. Lipiduria
9. Which of the following statement is FALSE?
- A. Apoptosis is followed by inflammatory response
 - B. Apoptosis results from the activation of caspases
 - C. Cytoplasmic changes during apoptosis cause the cytoplasm to turn pink due to binding of eosin to damaged proteins
 - D. During apoptosis, pyknosis causes nuclear shrinkage
10. Wheezing is the hallmark symptom of
- A. Asthma
 - B. COPD
 - C. Cystic fibrosis
 - D. Lung cancer
11. A lack of which of these will result in abnormally large red blood cells and a condition called megaloblastic anaemia?
- A. Oxygen
 - B. Vitamin C
 - C. Vitamin B₁₂ & Folic acid
 - D. Carbon dioxide
12. In haemorrhagic stroke, damage to cells occur by
- A. Pressure on brain cells
 - B. Blockage of the artery
 - C. Reduced blood flow
 - D. None of the above
13. Grave's disease is caused due to
- A. Vitamin B₁₂ deficiency
 - B. Poor diet
 - C. Autoimmunity
 - D. Reduced levels of thyroid hormone
14. Stage in which cancer cells are transported through the blood stream or lymphatic system is called as:
- A. Metastasis
 - B. Betastasis
 - C. Homeostasis
 - D. None of the above
15. Sickle cell anaemia is caused by replacement of glutamic acid in β -globin chain of haemoglobin by
- A. Arginine
 - B. Valine
 - C. Histidine
 - D. Leucine

16. Benign tumour is characterised by
 - A. Encapsulated or well-circumscribed boundary
 - B. Poorly-circumscribed and irregular boundary
 - C. Surrounding tissue invasion
 - D. None of the above
17. Ulcerative colitis is the inflammation of
 - A. Colon
 - B. Stomach
 - C. Oesophagus
 - D. None of the above
18. Clinical features of Polycystic ovarian syndrome (PCOS) include
 - A. Irregular periods
 - B. Excessive androgens
 - C. Polycystic ovaries
 - D. All of the above
19. Eosinophilic cytoplasmic inclusions seen in brain cells of a patient with Parkinson's disease are
 - A. Golgi bodies
 - B. Lewy bodies
 - C. Paschen bodies
 - D. None of the above
20. Gout is a disease due to defective metabolism of
 - A. Ammonia
 - B. Urea
 - C. Uric acid
 - D. All of the above

Q.No.2 Attempt any TWO questions of the following:

(20 Marks)

- A] Discuss in detail atherosclerosis.
- B] Discuss in detail diabetes mellitus.
- C] Discuss in detail asthma.

Q.No.3 Attempt any SEVEN questions of the following:

(35 Marks)

- A] Discuss clinical features and causes of chronic renal failure
- B] Explain causes and risk factors of hypertension.
- C] What is the mechanism of free radical induced cell injury.
- D] Write a note on Peptic ulcer.
- E] Write a note on Osteoporosis.
- F] Write a note on Parkinson's Disease
- G] Write a note on hepatitis.
- H] Write a note on inflammation
- I] Discuss the pathophysiology of AIDS.

----- END OF PAPER -----

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE

End Semester Examination – Summer 2022

Course: B. Pharmacy

Sem: II

Subject Name: Pathophysiology

Subject Code: BP 204T

Max Marks: 75

Date: 07/09/2022

Duration: 3:45 Hrs

Instructions –

1. All questions are compulsory
2. Answers to MCQs should be written in full sentences
3. Draw diagrams / figures wherever necessary
4. Figures to right indicate full marks

Q. 1. Multiple Choice Questions (MCQs) = 20 x 1 = 20 (All the questions are compulsory)

i) Deficiency of which clotting factor causes hemophilia A?

- a) VII
- b) VIII
- c) IX
- d) X

ii) Which type of diabetes generally occurs at juvenile age?

- a) Type I
- b) Type II
- c) Type III
- d) Type IV

iii) Which of the following can trigger atherosclerosis?

- a) High blood pressure
- b) High levels of cholesterol
- c) Smoking
- d) All of above

iv) Which disease is characterized by deficiency of dopamine?

- a) Alzheimers disease
- b) Parkinson's disease
- c) Schizophrenia
- d) None of these

v) Gout is a metabolic disorder characterized by elevated level of

- a) Serum cholesterol
- b) Serum bilirubin
- c) Serum uric acid
- d) None

vi) Low level of oxygen in blood is called as

- a) Anaemia
- b) Anorexia
- c) Hypoxia
- d) Hypercapnia

vii) Loss of appetite is known as

- a) Insomnia
- b) Anorexia
- c) Alopecia
- d) Nausea

viii) CHF occurs due to

- a) Intrinsic pump failure
- b) Increased workload on the heart
- c) Impaired filling of cardiac chamber
- d) All of these

ix) Which organ is majorly affected by hepatitis

- a) Liver
- b) Heart
- c) kidney
- d) brain

x) The term arthritis refers to

- a) Stiffnes in joint
- b) inflammation in joints
- c) Accute pain in joint
- d) None of these

xi) Programmed cell death known as

- a) Cytolysis
- b) Apoptosis
- c) Necrosis
- d) Proptosis

xii) Treatment of renal failure includes

- a) Dialysis
- b) Diuretics
- c) Both
- d) None

xiii) Meningitis is refer to

- a) Inflammation of the brain
- b) Blockage in nerves
- c) Both A & B
- d) None of these

xiv) Megaloblastic anaemia is caused by

- a) Iron deficiency
- b) impaired DNA synthesis
- c) Calcium deficiency
- d) oxygen deficiency

xv) Which type of hypertension has no identifiable medical cause?

- a) Primary
- b) Secondary
- c) Both
- d) None

xvi) The causative organism for Typhoid is

- a) Salmonella typhi
- b) Mycobacterium Leprae
- c) Mycobacterium Tuberculosis
- d) Clostridium perfringes

xvii) HIV attacks a certain kind of cell in the immune system.....

- a) RBC
- b) WBC
- c) Platelets
- d) All

xviii) Cancer of the blood cell is referred to as

- a) Kaposi sarcoma
- b) Basal cell carcinoma
- c) Mesothelioma
- d) Leukamia

xix) Ischemic heart disease includes

- a) Angina pectoris
- b) Atherosclerosis
- c) Both a and b
- d) None

xx) Modes of transmission of AIDS

- a) Sexual contact
- b) infected needle
- c) Infected blood
- d) All of these

Q. 2. Long Answers) = $2 \times 10 = 20$ (Answer 2 out of 3)

- i) Explain the pathophysiology of diabetes mellitus
- ii) What is cellular adaptation? Explain different types of cellular adaptations with their causes.
- iii) What is cancer? Give its classification, etiology, pathogenesis & treatment.

Q. 3. Short Answers = $7 \times 5 = 35$ (Answer 7 out of 9)

- i) Explain the etiology and pathogenesis of Jaundice.
- ii) What are the clinical manifestations and treatment of Parkinson's disease?
- iii) Explain components & types of feedback system.
- iv) Define hypertension. Give its etiology & pathogenesis.
- v) Write a note on etiology, clinical manifestation & treatment of asthma.
- vi) Define AIDS. Give its modes of transmission & prevention.
- vii) Discuss the pathogenesis & clinical manifestation of rheumatoid arthritis.
- viii) Give the causes, pathogenesis & treatment of leprosy.
- ix) Explain the etiology & pathogenesis of peptic ulcer.

-----END OF THE PAPER-----

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE

End Semester Examination – Winter 2022

Date: 12/05/2023

Course : B. Pharmacy
Subject Name : Pathophysiology
Max Marks : 75

Sem : II
Subject Code : BP204T
Duration : 3 Hr.

Instructions:

1. All questions are compulsory
2. Draw diagrams / figures wherever necessary
3. Figures to right indicate full marks

Q. 1. Objective Type Questions (Answer all questions)

(10 x 2) = 20

- i) Define terms leprosy and depression
- ii) Describe signs and symptoms of Parkinson's disease.
- iii) Define iron deficiency anemia and megaloblastic anemia.
- iv) Enlist signs and symptoms of hypertension.
- v) Enumerate causes of acute renal failure.
- vi) Enlist any four disorders related to sex hormones.
- vii) Enlist signs and symptoms of rheumatoid arthritis.
- viii) Differentiate between hyperthyroidism and hypothyroidism
- ix) Enumerate signs and symptoms of urinary tract infection.
- x) Discuss the etiology of jaundice

Q. 2. Long Answers (Answer 2 out of 3)

(2 x 10) = 20

- i) What are metabolic disorders? Explain the pathophysiology of diabetes mellitus.
- ii) Explain the etiology & pathogenesis of peptic ulcer.
- iii) Explain the etiology, pathogenesis and morphology of reversible cell injury.

Q. 3. Short Answers (Answer 7 out of 9)

(7 x 5) = 35

- i) Explain pathophysiology of gout.
- ii) Enlist and explain types of hepatitis.
- iii) Discuss pathophysiology of epilepsy.
- iv) Explain the pathogenesis and clinical symptoms of Asthma.
- v) Discuss chemical mediators of inflammation.
- vi) Explain etiology and pathogenesis of tuberculosis.
- vii) Explain the pathophysiology of AIDS.
- viii) Explain the pathogenesis and clinical symptoms of Chronic Obstructive Airway Disease.
- ix) Discuss in brief about atherosclerosis.

-----END OF THE PAPER-----

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE

End Semester Examination – Summer 2023

Date: 13/09//2023

Course : B. Pharmacy
Subject Name : Pathophysiology
Max Marks : 75

Sem: II
Subject Code : BP204T
Duration: 03 Hr.

Instructions:

1. All questions are compulsory
2. Draw diagrams / figures wherever necessary
3. Figures to right indicate full marks

Q. 1. Objective Type Questions (Answer all the questions) (10 x 2) = 20

- i) Define Pathophysiology. Explain the Scope of Pathophysiology.
- ii) Define the following terms: a) Atrophy b) Hyperplasia
- iii) Write the diagnostic tests for Myocardial Infarction (MI).
- iv) Define Anemia. Enlist any 4 types of Anemia
- v) Explain types of hepatitis.
- vi) Explain cause of chronic renal failure.
- vii) Explain sign & symptoms of gout.
- viii) Explain chemical mediators of inflammation.
- ix) Define terms leprosy & jaundice.
- x) Define terms hypothyroidism & hypertension.

Q. 2. Long Answers (Answer 2 out of 3) (2 x 10) = 20

- i) Define Asthma. Explain the pathogenesis, types, causes, and Prevention of Asthma.
- ii) Define TB. Explain the pathogenesis, types, causes, and Prevention of TB.
- iii) Define epilepsy. Explain the pathogenesis, types, causes, and Prevention of epilepsy.

Q. 3. Short Answers (Answer 7 out of 9) (7 x 5) = 35

- i) Write a note on UTI.(Explain the Types, Etiology, Diagnosis)
- ii) Define Atherosclerosis. Discuss the Pathogenesis & Causes of Atherosclerosis.
- iii) Define Angina Pectoris. Explain the Types, Etiology, Clinical Manifestations/ features, Diagnosis, and Treatment of Angina Pectoris.
- iv) Define COPD. Explain the pathogenesis, causes, and Prevention of COPD.
- v) Discuss in brief about rheumatoid arthritis.

- vi) Define diabetes mellitus. Discuss the Pathogenesis & Causes of diabetes mellitus.
 - vii) Explain the etiology & pathogenesis of peptic ulcer.
 - viii) What is AIDS? Explain the pathogenesis, causes, and Prevention of AIDS.
 - ix) Explain the etiology, pathogenesis and morphology of reversible cell injury.
-

BP 204T DBATU 2023

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE

Regular/Supplementary Summer Examination – 2024

Course: B. Pharmacy

Semester: II

Subject Name: Pathophysiology

Subject Code: BP204T

Max Marks: 75

Date: 20-06-2024

Duration: 3 Hr.

Instructions to the Students:

1. All questions are compulsory
2. Draw diagrams / figures wherever necessary
3. Figures to right indicate full marks

Q.1. Objective Type Questions (Answer All the Questions) (10 X 2) = 20

- i) Enlist the component and types of feedback system.
- ii) Define hypertrophy and hyperplasia.
- iii) Define Angina pectoris, Congestive Cardiac Failure.
- iv) Give the classification of Hepatitis.
- v) Give the signs and symptoms of Jaundice.
- vi) What is the clinical manifestation of Parkinson's disease.
- vii) Write a note on urinary tract infection
- viii) Enlist causative organism of Typhoid and Leprosy
- ix) Define AIDs. Give its mode of transmission and prevention.
- x) What is Gout

Q.2. Long Answers (Answer 2 out of 3) (10 X 2) = 20

- i) Define cell injury. Explain the mechanism of Cell Injury.
- ii) Define and classify Ulcer. Explain in detail signs symptoms and etiology.
- iii) Define and classify Diabetes Mellitus. Discuss in detail pathophysiology of Diabetes Mellitus.

Q.3. Short Answers (Answer 7 out of 9) (5 X 7) = 35

- i) Define Hypertension. Explain the pathophysiology of Hypertension.
- ii) Explain the positive and negative feedback mechanism with examples.
- iii) Explain etiology, signs symptoms and pathophysiology of Angina Pectoris
- iv) Define Anemia. Give the classification with examples. Explain Megaloblastic Anemia.
- v) Explain the pathophysiology of Depression
- vi) Discuss the pathogenesis and clinical manifestation of Rheumatoid arthritis.
- vii) What is Cancer. Give its classification, etiology and clinical manifestation.
- viii) Define Inflammation. Explain the mechanism of Inflammation.
- ix) Discuss the pathophysiology of Tuberculosis.

***** END OF THE PAPER *****

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE

Supplementary Examination - Winter 2023

Course: B. Pharmacy
Subject Name: Pathophysiology
Date: 10/01/2024

Sem : II
Subject Code: BP204T
Time: 10:00am to 1:00pm, Max Marks-75

Instructions:

1. All questions are compulsory
2. Draw diagrams / figures wherever necessary
3. Figures to right indicate full marks

Q. 1. Objective Type Questions (Answer all the questions)	(10 x 2) = 20
i) Differentiate between Metaplasia and Dysplasia.	02
ii) What are cardinal signs of Inflammation?	02
iii) Enlist the signs and symptoms of Hepatitis.	02
iv) Explain complications of Alcoholic liver disease	02
v) Define Iron deficiency and Megaloblastic anemia	02
vi) Enlist the causes of Acute renal failure.	02
vii) Causative agent, mode of transmission of Tuberculosis.	02
viii) Define Acidosis and Alkalosis.	02
ix) Name the causative organism for Meningitis and Typhoid.	02
x) Enumerate the signs and symptoms of Hyperthyroidism.	02
Q. 2. Long Answers (Answer 2 out of 3)	(2 x 10) = 20
i) Explain the etiology, pathogenesis and morphology of Reversible Cell injury.	10
ii) Explain Pathogenesis of- a) Essential hypertension b) Congestive cardiac failure.	10
iii) What is metabolic disorder? Explain the Pathogenesis of Diabetes mellitus.	10
Q. 3. Short Answers (Answer 7 out of 9)	(7 x 5) = 35
i) Explain pathogenesis of Rheumatoid arthritis.	05
ii) Define Tuberculosis. Explain the etiology, pathogenesis, signs and symptoms of Tuberculosis.	05
iii) Explain the vascular and cellular events of Inflammation.	05
iv) Differentiate between Intrinsic and Extrinsic Asthma.	05
v) Explain the pathogenesis, signs and symptoms of Parkinsonism.	05
vi) Explain the pathophysiology of Hepatitis B.	05
vii) Discuss the pathogenesis of Gout.	05
viii) Define Schizophrenia. Mention the positive and negative symptoms of Schizophrenia.	05
ix) Explain the pathophysiology of Cancer	05
