

DR. BABASAHEB AMBEDKAR TECHNICAL UNIVERSITY, LONERE

End Semester Examination – Summer 2023

Date – 06/09/2023

Course: B. Pharmacy

Sem: VIth

Subject Name: Pharmaceutical Biotechnology

Subject code: BP 605 T

Max marks: 75

Duration : 3 hrs

Instructions :

- 1. All questions are compulsory**
 - 2. Draw diagrams/ figures wherever necessary**
 - 3. Figures on right side indicate max marks**
-

Q1. Objective type (Answer all questions)

(10X2) = 20

1. What is frame shift mutation.
2. Define vector and write down features of good vector.
3. Write note on dried human plasma.
4. Define Biotechnology and give its scope.
5. What is the role of DNA polymerase in PCR.
6. Define enzyme immobilisation enlist different methods of immobilisation.
7. Explain the role of protease and peroxidase enzymes.
8. Define Biosensor and enlist different types.
9. Mention the role of DNA ligase in gene cloning.
10. What are interferons.

Q2. Long Answer type (Answer any 2 out 3)

(10X2) = 20

1. Define hypersensitivity explain different types of hypersensitivity.
2. Explain in detail Monoclonal antibody and give its applications.
3. Define cloning vector explain plasmid vector in detail.

Q3. Short answer (Answer any 7 out 9)

(5X7) = 35

1. Write preparation of Hepatitis B vaccine using recombinant biotechnology.
2. Write a note on ELISA.
3. What do you understand by term site directed mutagenesis.
4. Explain the structure of immunoglobulin.
5. Write a short note in transformation.
6. Describe the principal of recombinant DNA technology.
7. Write in short about PCR.
8. Mention production of insulin by recombinant DNA technology.
9. Define immunity and give its classification.

-----ALL THE BEST-----
